

## **Curriculum vitae: Stefano Polesello**

Stefano Polesello received his Ph.D. in Analytical Chemistry from the University of Milano in 1994, discussing a thesis about in situ spectroscopic studies of atmospheric reactions. After 2 years, spent as a post-doc fellow in the University of Milano and University of Verona, where he studied the effects of atmospheric pollution on cultural heritage, he joined the Water Research Institute (CNR-IRSA) as an associate researcher in 1996. Since 2003 he is Senior Researcher in the same Institute.

Main research fields:

- Development and validation of advanced analytical methods for analysis of emerging pollutants in water
- Risk assessment of priority and emerging pollutants in internal and coastal waters
- Chemistry of atmospheric deposition in high altitude and remote areas; glaciochemistry

Coordination of WP in international and national projects

- Since 2007: National Contact Point of the EC-funded Network NORMAN (Network of Reference Laboratories for Monitoring of Emerging Environmental Pollutants)
- Coordination of working units in national projects:
  - **2001-2006: Tecnologie innovative di controllo trattamento e manutenzione per la soluzione dell'emergenza acqua , Innovative Technologies for control, treatment and maintenance for water crisis– AQUATEC**”, supported by MIUR in the framework of Programma Operativo Nazionale (PON);
  - **2001-2006: Piano Nazionale di Ricerche in Antartide: Progetto 5.2:** Permafrost e variazioni climatiche in Antartide (National Research Plan in Antarctica: Project 5.2: Permafrost and climate change in Antarctica)
  - **Since 2007: WP3 – Sistemi di allarme rapido per la sorveglianza attiva del rischio di inquinamento di fonti idropotabili nell’ambito dell’Accordo di programma quadro tra la Presidenza del Consiglio dei Ministri – Dipartimento della Protezione Civile e il Consiglio Nazionale delle Ricerche (WP3: Early warning systems for the protection of drinking water sources, Framework Agreement between CNR and Civil Defense Department)**
  - **Since 2008: WP2: Monitoraggio di suoli ed acque per la protezione della salute umana nell’ambito del Progetto Interdipartimentale Ambiente e Salute del CNR (WP2: Soil and water monitoring for human health protection, of the CNR Project “Environment and Health”)**

Participation to expert groups:

- 1997-2000: Coordination of expert groups for the development of Italian official analytical methods for water
- 2003-2004: Italian delegate in the Expert Group on Analysis and Monitoring of Priority Substances (AMPS) for the implementation of Water Framework Directive (Directive 2000/60/EC).
- Since 2005: Italian expert in Chemical Monitoring Activity group for Water Framework Directive Implementation.

I published about 50 research and invited review papers on international journals devoted to analytical and environmental chemistry.

Since many years I am been carrying out a continuative peer-reviewing activity for some international journals devoted to analytical and environmental chemistry, such as Food Chemistry, Journal of Chromatography, Annali di Chimica, Talanta, Atmospheric Environment, Analytical and Bioanalytical Chemistry and Trends in Analytical Chemistry.
